

Data #3

CATEGORY: MEDIA WALL

SKS Technologies completed the design and installation of an indoor curved LED wall for Data#3 to complement their new Brisbane office. The LED wall is located in the lobby and creates a striking impression as you enter the office. The wall is nearly 10 metres long and has a resolution of 4800 x 780. It has a fine pixel pitch of 1.9mm and multiple video sources can be displayed simultaneously across the 'canvas'.
