

MYOB

CATEGORY: OFFICE FITOUT

SKS Technologies were engaged to complete MYOB's new Melbourne Head Office. Located at 17–21 Harcourt Parade, Cremorne. The project involved a substantial audio visual presence with a high quality permanent installation using high-quality commercial-grade equipment. The premises consists of Focus Rooms, 4,8 and 12P Conference Rooms, Boardroom, Collaboration Spaces, Training Rooms and a Town Hall Space.

The technology solution is focused on a Microsoft Teams environment to enable a familiar and consistent experience for all users. Due to the tight integration with IT systems and infrastructure, SKS Technologies worked closely with the client's IT department to ensure the successful deployment of inter-dependent systems.

The user experience was carefully considered to make it easy for staff to work, share and collaborate. Technologies included Crestron room booking systems, Crestron Flex, Crestron control systems, Shure microphones, QSC DSPs, and Samsung displays throughout.

In addition there was the requirement for Agile LCD Boards to be hung from the ceiling throughout the open work areas for individual business units to display and manage content and other information.

SKS were also awarded the Electrical and Communication Package. This consisted of 4 levels of exposed ceiling sprayed with vermiculite fire spray. This meant that exposed fixings for light fittings, cable supports and communications equipment had to be installed prior to the spray being applied with all final connections being post spray. In-depth planning was required to accomplish this challenge.

SKS installed R&M as the Cat6A & Fibre Optic Communications Vendor for this project and a Wireless Access Point network was also installed, with MYOB being a software company the reliability of IT Network was a critical element of this project.

SKS were delighted to be shortlisted as a preferred contractor by MYOB which led to our ultimate engagement to complete this project.
